

SECA WORKING GROUP CHARTER

WORKING GROUP NAME

Advanced Applications Working Group

PRIMARY AREAS OF FOCUS

Advanced Applications Working Group was formed to review all Siemens EMS advanced applications including Transmission and Distribution Network Applications, Operator Training Simulator, CMMS, AGC, and other generation dispatch applications. In general, this includes all subsystems that are NOT SCADA and not HIS related.

OBJECTIVES AND GOALS

Activities of the working group include,

- Data model exchange for advanced applications.
- Discuss both present and future issues and propose enhancements.

MEETING FREQUENCY AND DURATION

- Advanced Applications Working Group (AAWG) meets once every 6 months as part of the bi-annual SECA Conference, normally for a half day on the last day of SECA.

COMMON WORKING GROUP MATERIALS

This Working Group will produce the following materials pursuant to the SECA Working Group Policy.

- Working Group Charter
- WG One Year Work Plan
- Meeting Agendas
- Meeting Minutes
- Issues and Enhancements List

OTHER WORKING GROUP MATERIALS

- To the extent possible, AAWG members should communicate with each other, as needed between meetings, using the SECA Team room Share Point site.
- Advanced Applications Survey
