

SECA DataBase WORKING GROUP CHARTER

WORKING GROUP NAME

P3 Database Working Group

- Share/discuss issues in DB definition, maintenance as well as best practices.
 - Maintain ongoing spreadsheets of outstanding PDM and IMM issues and follow up with Siemens for updates on these outstanding issues.
 - Arrange for product updates (i.e., IMM) and, when possible, demos.
 - Provide a forum for PDM, IMM improvement suggestions and discussion.
-

WORKING GROUP NAME

TG Database Working Group

PRIMARY AREAS OF FOCUS

The Database Working Group will focus on database applications that are used in the support and maintenance of the Siemens products:

Spectrum TG – Source Database Editor (SDB)

OBJECTIVES AND GOALS

The Database Working Group's primary objective is to provide a forum for the user community to provide input and direction on Siemens database products. It will achieve this objective through the following:

Provide input to Siemens on current issues with existing products.

Provide input to Siemens on possible enhancements that the user community would like to see incorporated into the current products.

Provide input and feedback to Siemens on development of future database products.

MEETING FREQUENCY AND DURATION

The Database Working Group will meet twice a year during the SECA Conference and will normally meet for a about two hour time period.

COMMON WORKING GROUP MATERIALS

This Working Group will produce the following materials pursuant to the SECA Working Group Policy.

- Working Group Charter
- WG One Year Work Plan
- Meeting Agendas
- Issues and Enhancements List

OTHER WORKING GROUP MATERIALS

The Database Working Group will provide Siemens with input on current database applications as well as future products. As part of this objective, input may be solicited and generated by the group to provide official implementation for Siemens.
