

SECA Working Group Charter

Working Group Name

Security Working Group

Primary Areas of Focus

- All Siemens Control functions
- All Siemens Interface functions
- All SCADA functions
- Work in collaboration with Siemens for new system and substation functionality

Objectives and Goals

The Security Working Group will:

- Promote work between Siemens and customers to identify insecure processes and code.
- Provide a forum for Siemens and customers to discuss impacts of regulations proposed by regulatory bodies.
- Develop prioritized actions needed from Siemens to satisfy regulatory requirements in securing Control Systems.

Meeting Frequency and Duration

The Security Working Group will meet at the Spring & Fall SECA meetings on Sunday at the beginning of the meeting for two and a half hours.

Common Working Group Materials

This working group will produce the following materials pursuant to the SECA Working Group Policy.

- Working Group Charter (This document)
- Working Group One Year Work Plan
- Meeting Agendas
- Meeting Minutes
- Issues and Enhancements List

Other Working Group Materials

The Security Working Group will consider the prudence of publishing any or all of the work products for this area.
